properties

BRE tested for
down to a minimum
12.5° pitch

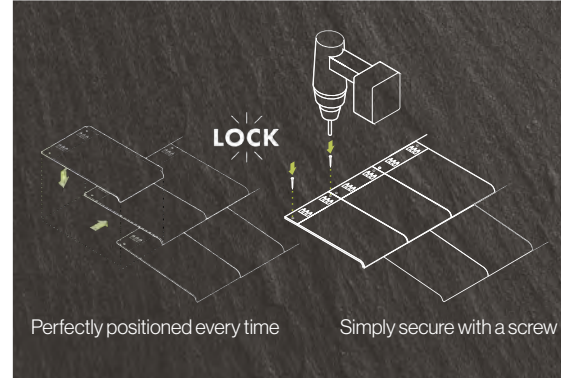

Weather tested to
147mph and
lifetime stormproof
guarantee

40-year
guarantee
for peace
of mind

WHY CHOOSE ENVIRO TILE?

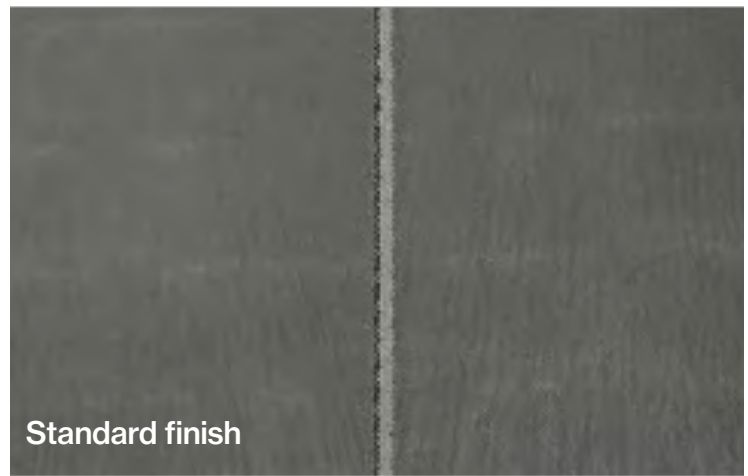

- ✓ The only complete roofing system that offers a lightweight, stormproof and sustainable alternative to traditional concrete or slate roofing tiles and a proven track record since 2011.
- ✓ 40 year product guarantee and lifetime stormproof guarantee.
- ✓ Unbreakable, so no unnecessary wastage whilst dry cut means no harmful airborne particles.
- ✓ Made using recycled plastic that can also be recycled at end of life, so very sustainable.
- ✓ Lower cost all round: fewer tiles per square metre in comparison with competitors, so lower overall tile cost and lower installation cost as fewer tiles to install.
- ✓ Best tile for low pitch applications down to 12.5°, as confirmed by BRE testing.
- ✓ Versatile - designed to be installed direct to batten, or board, creating a load of only 8.5kg per M²

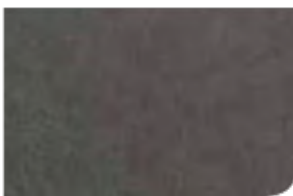

Available in four different colours and two stylish finishes. The standard tile has a beautifully textured and contemporary finish, whilst the slate effect tile is perfect for more traditional looking jobs.

Slate-effect finish

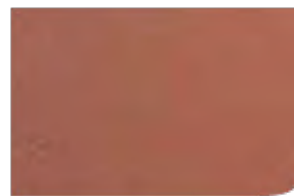

Standard finish

SLATE GREY

ANTHRACITE BLACK

TERRACOTTA

DARK BROWN

The tiles have a **slip resistant finish** to get the job done safely, whilst they also have anti fungal properties to ensure **minimal maintenance** for years to come.

BACKED BY EXPERTS

Envirotile has undergone the most rigorous testing with many professional bodies to ensure that it is more than fit-for-purpose and will withstand the worst storms that the British weather can throw at it. We are so confident that we offer a lifetime stormproof guarantee.

Envirotile is also backed by GreenSpec, the foremost 'Green Building' resource in the UK. Independent of companies and trade bodies and launched in 2003 with government funding, GreenSpec promotes sustainable building products, materials and construction techniques.
